

# Self-advocates & caregivers needed to participate in an online survey about autism-related services!

Participate in a new research study to help us understand what types of services people are using in the Dallas-Fort Worth metroplex.

*(Please feel free to share this with anyone who might be interested!)*

[Participate Now!](#)

The Autism and Developmental Disorders Research team at the University of North Texas Health Science Center (UNTHSC) is seeking participants for a research study. The study measures utilization of services available for individuals with Autism Spectrum Disorder (ASD) and related Developmental Disorders (DD) in the metroplex.

## Who can participate?

1. People aged 18 and above
2. People who are diagnosed with ASD/DD

OR

People who are caring for an individual diagnosed with ASD/DD

**What is the study about?** We want to identify patterns in the use of autism-related services. We also want to measure caregiver satisfaction with these services. This information could be used to improve availability and ease of access for such services in the future.

**What do I need to do?** Complete an online survey. The survey asks about what autism-related services you've used, and how satisfied you are with them. We also ask some things about you, like income, race/ethnicity, and education. ***Your name is not linked to any of your responses.***

**Where will it take place?** Anywhere with internet connectivity, on a computer or mobile device. (At some community events, we may also provide devices for participation on site).

**Do participants get paid?** You will be eligible for a small thank-you gift.

**How do I participate?** Visit [www.is.gd/autismsurvey](http://www.is.gd/autismsurvey) on any computer/mobile device, or access the questionnaire using the "Participate Now!" link above.

**Have questions? Email or call us any time!**
