FREE Intensive Parent Training Program

- Does your child have a diagnosis of autism?
- Does your child display problem behavior such as physical aggression, self-injury, property destruction, or defiance/noncompliance?
- Are you at your wit's end and don't know what else you can do to reduce your child's problem behavior?
- Are you willing to roll up your sleeves and work hard?
- Are you willing to learn some of the ABA (Applied Behavior Analysis) techniques that have helped numerous children with autism?

The Behavior Disorders Clinic at Child Study Center recently received a generous grant from Masonic Home and School of Texas to provide training to parents of children with autism. This program is fully-funded by Masonic Home and School of Texas, so services are provided to parents **at no cost**. The primary goal of this program is to teach parents effective ways of managing their children's problem behavior. If you answered yes to each and every question above, you are likely to be a great candidate for our intensive parent training program. Please call our clinic (817-390-2889) to schedule an informational session related to this program.

Duy D. Le, MS, BCBA
Director of Autism Services and Applied Behavior Analysis
Rector Family Chair in Applied Behavior Analysis
